ELMIRAN KASO

Electrical Engineer

EXPERIENCE

Dec. '24 – Present **Data Center Technician II**

Digital Realty Switzerland GmbH, Glattbrugg, Switzerland

- Installed, tested, and maintained electrical systems and infrastructure in mission-critical data center environments.
- Performed installation, maintenance, and troubleshooting of servers, networking hardware, and data center infrastructure.
- Conducted hardware diagnostics, component replacements, and cabling (fiber and copper) to support network connectivity.
- Assisted with server racking, stacking, and decommissioning activities following standard operating procedures (SOPs).
- Collaborated with remote engineering and IT and SE teams to execute work orders and resolve incidents.
- Maintained detailed documentation of hardware assets, work logs, and incident reports.
- Followed strict safety and security protocols in compliance with data center operational standards (e.g., ISO, ITIL).
- Monitored and controlled environmental systems via **Building Management System (BMS)**, responding to alerts for power, cooling, and humidity to maintain uptime and efficiency.
- Used **Salesforce** to manage and update work orders, incident tickets, and asset tracking with accurate documentation.
- Utilized **iTRACS DCIM software** to manage physical infrastructure, monitor capacity, and ensure optimal space and power utilization.
- Coordinated and supervised **vendor activities**, including scheduled preventive maintenance and emergency repairs for power, HVAC, and other facility systems.

April '24 – Nov. '24 **Data Center Electrical Technician**

CiriElektro AG, Zurich, Switzerland

- Installed, tested, and maintained electrical systems and infrastructure in mission-critical data center environments.
- Carried out power distribution installations, including UPS systems, PDUs, switchgear, Medium Voltage Panels, lighting and fire protection system.
- Interpreted and worked from electrical schematics, blueprints, and technical documentation.
- Ensured compliance with electrical codes, safety standards, and data center best practices.
- Coordinated with engineers, IT teams, and contractors to support system integration and commissioning.

Entersoft Business Suite

- Conducted troubleshooting and fault diagnosis on electrical circuits and control systems.
- Performed cable routing, termination, grounding, and bonding of electrical components and equipment.

May '18 – March '24 Sales Executive Engineer- Sales department Seller Hellas S.A., Athens, Greece.

- Sales executive engineer responsible for planning, executing, monitoring, controlling, closing projects and selling of complex of technological products and services like substations, electrical distribution panels and special applications.
- Responsible of the circuit breakers selectivity, the multiline schematics drawings and the proper wiring of the distribution boards.
- Planning, manage and informing for the project's technical specifications. Cooperate with the design department, logistic department and metal construction department to execute the manufacture of Low Voltage Distribution Boards, Medium Voltage Switchgear, Transformers e.t.c. according to customers' needs and project requirements.
- With responsibilities that include maintaining extensive knowledge of electrical products, parts, operations and processes to assist in closing sales where technical expertise may be required to meet customer needs.
- Achieved sales goals and service targets by cultivating and securing new customers relationships
- Increased revenue by implementing effective sales strategies in sales cycle process from prospecting leads through close
- Researched sales opportunities and possible leads to exceed sales goals and increase profits.
- I possess a comprehensive understanding of Schneider Electric, Legrand, Siemens, and ABB's low-voltage equipment catalog, demonstrating proficiency across the range of products and solutions offered by the companies. This includes a deep knowledge of Product Range, Technical Specifications, Product Features, Application Knowledge, Updates, and Innovations.
- Familiarity with entire catalogs of low-voltage equipment reflects a deep understanding of the products, their capabilities, and their applications, positioning me as a knowledgeable resource for electrical system design, installation, and maintenance projects.

Feb.'12 – May '18 Electrical Design Engineer Zita Technologies Ltd

- Study of the tender technical descriptions, special specifications and the project requirements to calculate and choose the right electrical machinery, devices, equipment like generators, transformers e.t.c.
- Planning, calculating and visualizing on 3D for indoor and outdoor lighting, choosing the right luminaires according to the requirements and specifications of each space, using Dialux and Relux software according to International and European Standards CEN, CIE (EN 12464, EN 13201, EN 12464-2).
- 2D & 3D design of projects using AutoCAD and Revit MEP software.

NOTE: If you have not received the total number of pages or they are not legible and for any further information, please call +41 762259143 or contact kasoelmiran@gmail.com e-mail

- Prepare of documentation, files and data sheets of the equipment in use like inverters, pumps, generators e.t.c.
- Collaboration with the structural engineers, mechanical engineers, chemical engineers and technician departments to coordinate for the project's execution.
- Elaborating of study and planning, design and supervision of WWTP (Waste Water Treatment Plant), Substations and Pump Stations.
- Calculation of Short-Circuit Current, Voltage Drop, Cable Size, Active Power, Reactive Power, Selectivity of Protection Devices (ACB, MCB, MCCB, RCBO, e.t.c.).
- Design of single-line and multiline diagram of electrical distribution panels using EPLAN, 4M ADAPT and TiSoft.
- Having a comprehensive understanding of various technical aspects related to wastewater treatment processes, environmental regulations, engineering principles, and project management.

Sept. '05 – Nov '08

Electrical Technician

AM-NET L.t.d, Athens, Greece.

- Electrical cables installation using conduits and cable trays.
- Disconnecting / Connecting electrical devices, equipment, luminaires, motors, inverters and pumps.
- Transmitter calibration and Testing of equipment
- Installing and maintaining wiring, control, and lighting systems.
- Inspecting of electrical components, such as transformers and circuit breakers. Identifying electrical problems using a variety of testing devices. Repairing and replacing wiring, equipment, or fixtures using hand tools and power tools.
- installation of control systems, including HVAC controls, security systems, and automation systems.

EDUCATION

Feb. '07 – Jun. '12 University of West Attica (UniWA)
Previously known as the Technological Educational Institute of Athens (TEI of Athens)
Degree: Bachelor of Science in Electrical Engineering
(Four-year university program).

Feb. '07 – Jun. '12 Technical Professional/Vocational High School
Degree: Diploma of Electrical Technician
(Three-year Technical Professional High School, Electrical Department).

CERTIFICATION

Jun. '25 Schneider Electric
An Overview of Data Center Physical Infrastructure

Jan. '25 Schneider Electric
Best Practices for Building a New Data Center Certificate

Jan. '24 Autocad 2D&3D Modeling
AutoDesk

Nov. '22 KNX Basic Course – KNX Partner-Building Automation and Control System
KNX Association

May '18 EPLAN Electric P8 – Electrical Schematic Design.
ΣΕΒ – ΙΒΕΠΕ (Institute of Industrial and Business Education & Training)

Oct. '17 AutoDesk Revit MEP 2017
AutoDesk

May '16 Lighting Protection of Electrical and Electronic Systems –
Elemko S.A.

Oct. '14 Generators Sizing Calculations-
Petros Petropoulos AEBE - Petrogen

Jan. '13 Wastewater Treatment Plant, Municipal Solid Waste-
Piraeus University of Applied Science – Higher Technological Education Institute of Piraeus.
