ELMIRAN KASO

Electrical Engineer

EXPERIENCE

Dec. 2025 – Present Site Engineer

Digital Realty Switzerland GmbH, Glattbrugg, Switzerland

- Responsible for site operations, coordination, and supervision of mission-critical infrastructure
- Support electrical systems, troubleshooting, and maintenance in data center environments
- Coordinate vendors, maintenance activities, and engineering teams
- Ensure high availability, safety, and reliability of systems

Dec. 24 – Dec. '25 Customer Service Engineer

Digital Realty Switzerland GmbH, Glattbrugg, Switzerland

- Supported operation, maintenance, and troubleshooting of electrical and IT infrastructure in mission-critical data center environments
- Performed hardware diagnostics, system maintenance, and structured cabling (fiber and copper)
- Monitored electrical and environmental systems via BMS to ensure uptime and operational efficiency
- Collaborated with engineering, IT, and site teams to execute work orders and resolve incidents
- Managed work orders, incident tracking, and asset documentation using Salesforce and DCIM tools (iTRACS)
- Coordinated vendor activities, including preventive maintenance and emergency repairs for electrical and HVAC systems

April '24 – Nov. '24 Data Center Electrical Technician

CiriElektro AG, Zurich, Switzerland

- Installed, tested, and maintained electrical systems and infrastructure in mission-critical data center environments
- Performed power distribution installations, including UPS systems, PDUs, switchgear, medium-voltage panels, lighting, and fire protection systems
- Conducted troubleshooting and fault diagnosis on electrical circuits and control systems
- Executed cable routing, termination, grounding, and bonding of electrical systems and equipment
- Interpreted electrical schematics, technical drawings, and documentation to support installation and commissioning

May '18 – March '24 Sales Executive Engineer- Sales department

Seller Hellas S.A., Athens, Greece.

- Managed technical projects involving substations, electrical distribution systems, and MV/LV equipment, from design review to final delivery
- Performed electrical studies including circuit breaker selectivity, and developed multiline schematics and technical documentation
- Coordinated with design, production, logistics, and construction teams to ensure project execution according to technical specifications
- Prepared and reviewed technical offers, ensuring alignment with customer requirements and engineering standards
- Supervised technical processes within the sales department, supporting project planning and execution
- Developed strong expertise in low-voltage and medium-voltage equipment from Schneider Electric, ABB, Siemens, and Legrand

Feb.'12 – May '18 Electrical Design Engineer

Zita Technologies Ltd

- Performed electrical studies and technical evaluations of project specifications, selecting appropriate equipment such as generators, transformers, and electrical systems
- Designed and developed electrical systems for industrial and infrastructure projects, including WWTP, substations, and pump stations
- Executed 2D and 3D electrical design using AutoCAD and Revit MEP
- Performed electrical calculations including short-circuit analysis, voltage drop, cable sizing, active/reactive power, and protection device selectivity
- Designed single-line and multiline diagrams for electrical distribution systems using EPLAN, 4M ADAPT, and TiSoft.
- Conducted lighting design and analysis using DIALux and Relux in accordance with international standards (CEN, CIE, EN 12464, EN 13201)
- Prepared technical documentation, datasheets, and project files for electrical equipment and systems
- Collaborated with multidisciplinary teams (mechanical, civil, chemical engineers) to ensure proper project coordination and execution

Sept. '05 – Nov '08 Electrical Technician

AM-NET L.t.d, Athens, Greece.

- Installed electrical cables using conduits and cable trays
- Performed installation, connection, and maintenance of electrical equipment including luminaires, motors, inverters, and pumps
- Conducted testing, calibration, and troubleshooting of electrical systems and control equipment
- Installed and maintained wiring, lighting, and control systems
- Inspected electrical components such as transformers and circuit breakers, identifying and resolving faults
- Supported installation of control and automation systems, including HVAC and security systems
